Toxicology letters

Toxicology Letters 79 (1995) 313–314

Author index

Volume 79 (1995)

Al-Bayati, M.A., see Knaak, J.B. **79**, 87
Andersen, M.E., Development of physiologically based pharmacokinetic and physiologically based pharmacodymamic models for applications in toxicology and risk assessment **79**, 35
Arcos, J.C., see Woo, Y.-t. **79**, 219
Argus, M.F., see Woo, Y.-t. **79**, 219

Basak, S.C., S. Bertelsen, G.D. Grunwald, Use of graph theoretic parameters in risk assessment of chemicals **79**, 239
Bertelsen, S., see Basak, S.C. **79**, 239
Blake, B.W., see Mumtaz, M. **79**, 131
Bradbury, S.P., Quantitative structure-activity relationships and ecological risk assessment: an overview of predictive aquatic toxicology research **79**, 229
Bristol, D.W., Summary and recommendations for Session B: activity classification and structure-activity relationship modeling for human health risk assessment of toxic substances **79**, 265
Brownlee, L.J., see Hollebone, B.R. **79**, 157

Childress, T.A., see Mattie, D.R. **79**, 291
Cibulas, W., see Wilson, J.D. **79**, 1
Clewell III, H.J., The application of physiologically based pharmacokinetic modeling in human health risk assessment of hazardous substances **79**, 207
Constan, A.A., see Yang, R.S.H. **79**, 193

DeRosa, C.T., Charge to workshop **79**, 7
DeRosa, C.T., see Mumtaz, M. **79**, 131
DeRosa, C.T., Decision Support Methodologies for Human Health Assessment of Toxic Substances: Agency for Toxic Substances and Disease Registry's perspectives on collaboration and infrastructure development among government, academia, and industry **79**, 283
Durkin, P., R. Hertzberg, W. Stiteler, M. Mumtaz, The identification and testing of interaction patterns **79**, 251

El-Masri, H.A., see Yang, R.S.H. **79**, 193

Fiserova-Bergerova, V., Extrapolation of physiological parameters for physiologically based simulation models **79**, 77
Frederick, C.B., Summary of panel discussion on the 'advantages/limitations/uncertainties in the use of physiologically based pharmacokinetic and pharmacodynamic models in hazard identification and risk assessment of toxic substances' **79**, 201

Gombar, V.K., see Mumtaz, M. **79**, 131
Grunwald, G.D., see Basak, S.C. **79**, 239

Hansch, C., D. Hoekman, A. Leo, L. Zhang, P. Li, The expanding role of quantitative structure-activity relationships (QSAR) in toxicology **79**, 45
Hertzberg, R., see Durkin, P. **79**, 251
Hoang, K.-C.T., Physiologically based pharmacokinetic models: mathematical fundamentals and simulation implementations **79**, 99
Hoekman, D., see Hansch, C. **79**, 45
Hollebone, B.R. L.J. Brownlee, A thermodynamic QSAR analysis of the polysubstrate monooxygenase responses to xenobiotic chemicals **79**, 157
Huque, K.I., see Mumtaz, M. **79**, 131

Jarabek, A.M., The application of dosimetry models to identify key processes and parameters for default dose-response assessment approaches **79**, 171
Johnson, B.L., Welcome address **79**, 3
Johnson, B.L., ATSDR's information databases to support human health risk assessment of hazardous substances **79**, 11

Kent, R.J., see Wagner, P.M. **79**, 67
Klopman, G., H.S. Rosenkranz, Toxicity estimation by chemical substructure analysis: the TOX II program **79**, 145
Knaak, J.B., Perspectives on collaboration and infrastructure development: industry perspectives **79**, 305
Knaak, J.B., A. Al-Bayati, G. Raabe, Development of partition coefficients, V_{max} and K_m values, and allometric relationships **79**, 87

Knauf, L.A., see Mumtaz, M. **79**, 131
Kohn, M.C., Achieving credibility in risk assessment models **79**, 107

Lai, D.Y., see Woo, Y.-t. **79**, 219
Leo, A., see Hansch, C. **79**, 45
Leung, H.-W., D.J. Paustenbach, Physiologically based pharmacokinetic and pharmacodynamic modeling in health risk assessment and characterization of hazardous substances **79**, 55
Li, P., see Hansch, C. **79**, 45

Machuga, E.J., see Matthews, E.J. **79**, 123
Martin, L.S., see Mattie, D.R. **79**, 291
Matthews, E.J., E.J. Machuga, Threshold of estimated toxicity for regulation of indirect food additives **79**, 123
Mattie, D.R., L.S. Martin, T.A. Childress, Program development in military toxicology laboratories **79**, 291
Medinsky, M., The application of physiologically based pharmacokinetic/pharmacodynamic (PBPK/PD) modeling to understanding the mechanism of action of hazardous substances **79**, 185
Menzel, D.B., Extrapolating the future: research trends in modeling **79**, 299
Mumtaz, M., see Durkin, P. **79**, 251
Mumtaz, M., L.A. Knauf, D.J. Reisman, W.B. Peirano, C.T. DeRosa, V.K. Gombar, B.W. Blake, K.I. Huque, V.M.S. Ramanujam, Assessment of effect levels of chemicals from quantitative structure-activity relationship (QSAR) models. I. Chronic lowest-observed-adverse-effect-level (LOAEL)
Murray, E., see Wilson, J.D. **79**, 1

Nabholz, J.V., see Wagner, P.M. **79**, 67

O'Flaherty, E.J., Perspectives on collaboration and infrastructure development among government, academia, and industry **79**, 297
Olden, K., NIEHS perspectives on collaboration among government, academia, and industry **79**, 287

Paustenbach, D.J., see Leung, H.-W. **79**, 55
Peirano, W.B., see Mumtaz, M. **79**, 131

Raabe, O.G., see Knaak, J.B. **79**, 87
Ramanujam, V.M.S., see Mumtaz, M. **79**, 131
Reisman, D.J., see Mumtaz, M. **79**, 131
Richard, A.M.,Role of computational chemistry in support of hazard identification (ID): mechanism-based SARs **79**, 115
Rosenkranz, H.S., see Klopman, G. **79**, 145

Scheuplein, R.J., Information needed to support hazard identification and risk assessment of toxic substances **79**, 23
Schwetz, B.A., Use of mechanistic and pharmacokinetic data for risk assessment at the National Institute of Environmental Health Sciences (NIEHS) **79**, 29
Stiteler, W., see Durkin, P. **79**, 251

Thomas, R.S., see Yang, R.S.H. **79**, 193

Vandenberg, J.J., Risk assessment and research: an essential link **79**, 17

Wagner, P.M., J.V. Nabholz, R.J. Kent, The new chemicals process at the Environmental Protection Agency (EPA): structure-activity relationships for hazard identification and risk assessment **79**, 67
Wilson, J.D., W. Cibulas, E. Murray, Introduction **79**, 1
Woo, Y.-t., D.Y. Lai, M.F. Argus, J.C. Arcos, Development of structure-activity relationship rules for predicting carcinogenic potential of chemicals **79**, 219

Yang, R.S.H., H.A. El-Masri, S. Thomas, A. Constan, The application of physiologically based pharmacokinetic/pharmacodynamic (PBPK/PD) modeling for exploring risk assessment approaches of chemical mixtures **79**, 193

Zhang, L., see Hansch, C. **79**, 45

Toxicology letters

Subject index

Volume 79 (1995)

Academic **79**, 297
Acceptable daily intake **79**, 23
Activity classification **79**, 265
Adverse health effects **79**, 11
Agency for Toxic Substances and Disease Registry (ATSDR) **79**, 305
Allometry **79**, 87
Antagonism **79**, 251
Aquatic toxicology **79**, 229
Artificial intelligence **79**, 265
Atom pairs **79**, 239

Benzene metabolism **79**, 185

Calfornia EPA (CALEPA) **79**, 305
Chemical carcinogen **79**, 219
Chemical emergencies **79**, 11
Chemical functionality **79**, 145
Chemical mixtures **79**, 193
Chlorinated solvents **79**, 87
Chronic toxicity assessment **79**, 131
Collaboration **79**, 287
Computational chemistry **79**, 115
Computer simulations **79**, 99
Continuing education **79**, 297
Cytochrome P-450 induction **79**, 45

Decision support **79**, 265
Decision-support methodologies **79**, 283
Default assumptions **79**, 201
Department of Defense **79**, 291
Dosimetry **79**, 171

Environmental Protection Agency (EPA) **79**, 305
Environmental **79**, 287
Ethylacrylate **79**, 87
Expert system **79**, 219
Extrapolation **79**, 35, 55

Feature selection **79**, 265
Food additives **79**, 23
Food and Drug Administration (FDA) **79**, 305
Food substances **79**, 23

Graph invariant **79**, 239

Hazard assessment **79**, 67
Hazard identification **79**, 115, 201, 219, 229, 265
Hazardous substances **79**, 207
Hazardous waste sites **79**, 11, 193
Health risk assessment **79**, 17, 55
Heuristic analysis **79**, 265
Human expert system **79**, 265
Hydroquinone **79**, 185

Indirect food additive **79**, 123
Information databases **79**, 11
Inhaled dose **79**, 77
Intelligent computer system **79**, 265
Interspecies scaling **79**, 171
Isofenphos **79**, 87

K_m **79**, 87
Knowledge bases **79**, 29

Linear free energy relationships (LFERs) **79**, 145
Lowest-observed-adverse-effect level (LOAEL) **79**, 131

Machine learning **79**, 265
Mathematical models **79**, 99
Mechanism-based structure-activity **79**, 115
Mechanistic structure-activity relationship **79**, 157
Military toxicology **79**, 291
Mode of toxic action **79**, 229
Molecular modeling **79**, 115
Molecular similarity **79**, 239
Monte Carlo analysis **79**, 251
Mutagenicity **79**, 239, 45

New York State Department of Health (NYSDH) **79**, 305

PBPK modeling **79**, 207
PBPK models **79**, 107

PBPK/PD modeling **79**, 193, 55
PCBTF **79**, 87
Partition coefficients **79**, 87
Pattern recognition **79**, 265
Pharmacodynamics **79**, 35
Pharmacokinetic compartments **79**, 77
Pharmacokinetic studies **79**, 29
Pharmacokinetics **79**, 35, 207
Phenol metabolism **79**, 185
Physician education **79**, 11
Physiologically based pharmacokinetic **79**, 99
Physiologically based pharmacokinetic (PBPK) model **79**, 87
Physiologically based pharmacokinetic modeling **79**, 171, 201
Physiologically based pharmacokinetic models **79**, 77, 297
Physiologically based pharmacokinetic/pharmacodynamic (PBPK/PD) modeling **79**, 185
Physiologically based pharmacokinetics **79**, 299
Physiologically based pharmacokinetics (PBPK) **79**, 305
Polysubstrate monooxygenase **79**, 157
Predictive toxicology **79**, 265
Priority data needs **79**, 283
Program development **79**, 291
Public health assessments **79**, 11

QSAR **79**, 45
Quantitative Structure Activity Relationships (QSAR) **79**, 123
Quantitative structure-activity relationship **79**, 297
Quantitative structure-activity relationship (QSAR) modeling **79**, 131
Quantitative structure-activity relationships **79**, 229

Research **79**, 17
Risk **79**, 157
Risk assessment **79**, 35, 67, 77, 107, 171, 193, 201, 207, 219, 239
Risk management **79**, 17

Safety factor **79**, 23
SAR **79**, 115
Structure-activity relationship **79**, 265
Structure-activity relationship analysis **79**, 219
Structure-activity relationships **79**, 299
Structure-activity relationships (SAR) **79**, 67, 305
Substance-specific applied research program **79**, 283
Superfund **79**, 11
Synergism **79**, 251

Teaching **79**, 297
Threshold of Regulation **79**, 123
Topological indices **79**, 239
Toxicity studies **79**, 29
Toxicodynamic models **79**, 299
Toxicologic interactions **79**, 251
Toxicology **79**, 287
Toxicophores **79**, 145
TOX II program **79**, 145
Tri-Service Toxicology **79**, 291

Uncertainty **79**, 171, 201

V_{max} **79**, 87
Validation of models **79**, 107
